**A SPECIAL LECTURE ON THE TOPIC "STEREOCHEMISTRY
UNDER FACULTY EXCHANGE PROGRAMME"**

A Special Lecture on the topic "Stereochemistry and their applications" was organized on 14-03-22 at 10.55 am by Dr. Venkatesh Bhovi, Department of P. G. Studies in Chemistry, Vijayanagara College, Hosapete, Ballari, was invited as a Resource Person.

Dr. Venkateh, explains that, the stereochemistry may seem like a trivial subject because differences between stereoisomers are usually subtle. In nature, however, and most importantly, in biological systems such as the

human body, these subtle differences have sweeping implications. Most drugs for example, are often composed of a single stereoisomer of a compound, and while one stereoisomer may have positive effects on the body, another stereoisomer may be toxic. Because of this, a great deal of work done by synthetic organic chemists today is in devising methods to synthesize compounds that are purely one stereoisomer.

Principal Prof. W. Sharanappa delivered the presidential remark on this occasion. Dr. T. R. Ravikumar Naik, Co-ordinator, Dept of P. G. Studies in chemistry, welcome the guest and Introduced Dr. Venkatesh to the gathering. Kum. Archana, Dept of P. G. Studies in chemistry, presented vote of thanks. All the teaching and non teaching staff members of the Dept of Chemistry were present during this event.

Output of this Faculty exchange programme: 31 Students of dept of P. G. Studies in Chemistry actively participated during the programme, and all the students' performance in the internal examination was good.
